PROFESSIONAL SUMMARY

Frontend and full-stack developer with 4+ years of professional experience, including 3+ years building production web applications in React, Next.js and TypeScript. Co-founder and technical lead at CipherPeak, leading a cross-functional team of 6 (UI/UX, Android, backend and frontend) while managing client relationships from first meeting to delivery. Delivered projects against fixed deadlines, including the ticketing platform used at the gates of the Nehru Trophy Boat Race 2026, and launched live e-commerce platforms processing 200+ orders per month. Seeking frontend or technical lead roles in the UAE.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Vite, Zustand, HeroUI, responsive design, Progressive Web Apps (PWA), on-page SEO

Backend and Data: Supabase (PostgreSQL, Auth, Storage, Row-Level Security), Next.js route handlers and server actions, REST API integration (Python/Django backend), PHP

Integrations: Razorpay, Airpay, Resend, WhatsApp Cloud API, Google Analytics 4, Meta Pixel, Meta Ads, Google Ads

Platforms: Shopify (theme customization, app and payment integration), WordPress, HubSpot

Tools and Deployment: Git, GitHub, Vercel

AI-Assisted Development: Claude Code, Codex, Antigravity (code generation, debugging, optimization)

Leadership: Team leadership, client requirement gathering, technical proposals, technology stack selection, task planning and progress review

PROFESSIONAL EXPERIENCE

Co-Founder & Director (Technical Lead)

Dec 2022 – Present

CipherPeak Private Limited, Cherthala, Kerala | *Part-time alongside employment until Jan 2024, full-time since*

- Lead a cross-functional team of 6 (UI/UX, Android, backend and frontend) from requirements to delivery, assigning tasks, reviewing progress against deadlines, and keeping design, mobile, backend and frontend work aligned.
- Handle client communication from first meeting to delivery: run requirement meetings, translate business needs into technical scope, prepare proposals, keep clients updated on progress, and verify deliverables against the agreed requirements before handover, for clients in India and the UAE, including catalogue and enquiry websites for two UAE automotive detailing brands, Weinber Inc. and VE LUX.
- Select the technology stack and structure the team for each project (Next.js, TypeScript, Supabase, Django), and plan delivery around fixed client deadlines, including a ticketing and gate-entry system that had to be live on race day.
- Guide the team to use AI coding tools (Claude Code, Codex, Antigravity) for development, debugging and optimization, to speed up delivery and catch bugs earlier, with all code tested before release.
- Build and deploy production frontends on Vercel, and handle on-page SEO and analytics setup for client websites. Ran Meta and Google ad campaigns for clients until a dedicated marketer was hired.
- Delivered 3-4 Shopify stores end to end, including theme customization, app and payment gateway integration, store setup, and admin training for client staff.

Web/Software Developer

Jun 2022 – Jan 2024

EventGurus, Ernakulam, Kerala

- Developed and customized client websites using WordPress, HubSpot, HTML, CSS, JavaScript and jQuery.
- Converted design mockups into responsive web pages, using AJAX and JSON for dynamic functionality.
- Maintained PHP back-end functionality and applied SEO best practices across client sites.
- Debugged and tested sites before release, and worked with in-house designers and clients to resolve issues.

Freelance Web Developer and IT Support

2020 – 2022

Self-employed

- Built HTML and PHP websites and projects for individual clients.
- Provided IT support and trained office staff to use business software.

KEY PROJECTS

Nehru Trophy Boat Race 2026: Event Website and Ticketing Platform | Next.js, Supabase

- Built the public event website in Next.js, with ticket tier pricing read live from the booking database, SEO and Open Graph tags, a sitemap, and a responsive mobile layout.
- Developed an online booking flow with quota-based ticket tiers, temporary seat holds, and a payment webhook designed to handle repeated calls safely; payment integration (Airpay) tested end to end in a sandbox environment.
- Built a role-based admin panel (dashboard, orders, attendee search, scan log) and loaded 32,125 physical ticket serials for conversion to digital gatepasses.
- Built an installable mobile scanner (PWA) used by gate volunteers on race day to verify 500+ premium-seat attendees, with camera QR scanning, a manual-entry fallback, and an atomic one-time-use check to prevent duplicate entry.
- Wrote concurrency tests for booking and payment logic.

Linen Centre, Image Cottons and Build Crest: E-commerce and Catalogue Platforms | Next.js, TypeScript, Supabase

- Built and launched three live platforms, each with a Next.js storefront, a custom React admin panel, and a Supabase (PostgreSQL) backend with row-level security; the stores process 200+ orders per month.
- Implemented checkout with Razorpay and signature-verified webhooks, atomic stock reservation, coupon redemption, zone-based shipping, invoice PDFs, and order notifications by email and WhatsApp.
- Developed admin panels with role-based access for product and variant management, order handling, refunds, reporting and CSV export.
- Created a UAE building-materials catalogue (Build Crest) with advanced filtering, a mega-menu, and a shortlist-to-WhatsApp enquiry flow.

CipherPeak ERP: Enterprise Platform | React, Django

- Built the web frontend for a 38-module enterprise platform covering operations and supply chain, finance and tax, sales and CRM, HR and governance, and analytics (frontend deployed on Vercel; backend integration in progress).
- Directed a backend developer building the custom Python/Django API and defined the integration between frontend and backend.

EDUCATION

Bachelor of Computer Applications 2016 – 2019
Fr. Porukara CMI College of Advanced Studies, Champakulam, Kerala

Data Science with Python 2019 – 2020
